ABOUT MYSELF

I am a BS Electrical Engineering student from FAST NUCES. I have a strong understanding of core subjects like circuit analysis, electromechanical systems, computer networks, IoT, digital logic designs, electronic devices, and feedback control systems.

I am skilled in using **MATLAB** for modeling, Proteus for circuit simulations, and **C++** for technical tasks. I am also good at working with a team to solve engineering problems. My goal is to use my university learning to handle real-world challenges effectively.
